medical immediate release / compel motion.

~~Back~~ Back in July of 2018,

1. ✓ I was practicing knee kicks during recreation. As I clinched and brought my ~~leg~~ right knee up, I felt the some kind of "funny" sensation in my right foot and ankle as if I hit the funny bone. This continued since. Recently I was practicing knee kicks again and I felt the same feeling in my right foot and ankle.
2. In segregation cells, the lights are on at day light level 24/7. This has caused me sleep deprivation, etc. It is impossible to get deep sleep due to this housing condition. Also due to quality of the mattress, sleeping on the sides or the belly is extremely uncomfortable and even painful.

The court should compel the Gregg County Jail to atleast dim the light at night.
